

Introducing the premier edition of investment grade wearable art from the artists and scientists of Refractal Design: the fractal pattern 'deepsea rising'. On a single, perfect crystal of Czochralski sapphire, the fractal is comprised of half a million microlithographically placed points of 18K gold, each point one-tenth the diameter of a human hair. The patents-pending MICROART™ process creates a design combining unprecedented precision with exquisite beauty. The 22mm sapphire is sculpturally framed in 950 platinum and 18K gold, set with diamonds and sapphires.

'Deepsea rising'

This combination brooch/pendant is limited to a world-wide edition of 100 hand-numbered pieces. Each comes in a hand-made silk and satin presentation purse secured by a beautiful 18K gold button, with a numbered certificate of authenticity, a descriptive booklet and a premium 7x Hastings triplet jeweler's loupe to enhance your appreciation of the fractal's beauty. A gold or platinum chain, offered from the collections of the world's finest designers, completes the package.

Our preferred clients will receive advance notice of future editions which will showcase new technology and its applications. Join us as we continue to advance the state of the art and donate the maximum allowable revenues to a variety of charities.

Price: \$25,000.

Let the art speak for itself.

Invest in Creating Art History
