

Submit Your Website To The Top 1,200+ Internet Directories

Internet directories specialize in linking to other sites and categorizing those links. Directories often allow site owners to directly submit their site for inclusion, and have editors review submissions for fitness.

An established, quality directory is one that is heavily, yet carefully, promoted on the web, and search engines reward the directory accordingly. Now, when your site's link is posted on the directory the search engines will find it, and some of the trust gained from the promotion of the directory is passed along to your website.

Before submitting to ANY directory, ensure that it is 'white hat' and has a positive PR value with a large number (typically in the thousands) of backlinks to it. Additionally, make sure it is not an aggregator or spider robot site that prefers to index relevancy by crawling through external links. Submitting to a robot-driven site can act as a 'yellow flag', as they identify those submitting manually and potentially add you to their 'sandbox' with a 6-month delay on indexing. For the larger aggregators that feed off of directory submissions, this could delay your sites' upwards migration from directory, to aggregator, to engine.

So for the purposes of search engine optimization, directories provide an excellent way to obtain high-quality links and increase your rankings big time.

There are thousands of directories on the Web and it takes time and effort to tell which of them are high quality and established. For your convenience, below is a list of hand-picked most valuable directories that are worth submitting your website to.

And the best news is that these all are *totally free to join!*

Here's the monster list of over 1,200 directories:
